

Malaria Deaths in Africa: 2000-2014

Which countries are most affected?

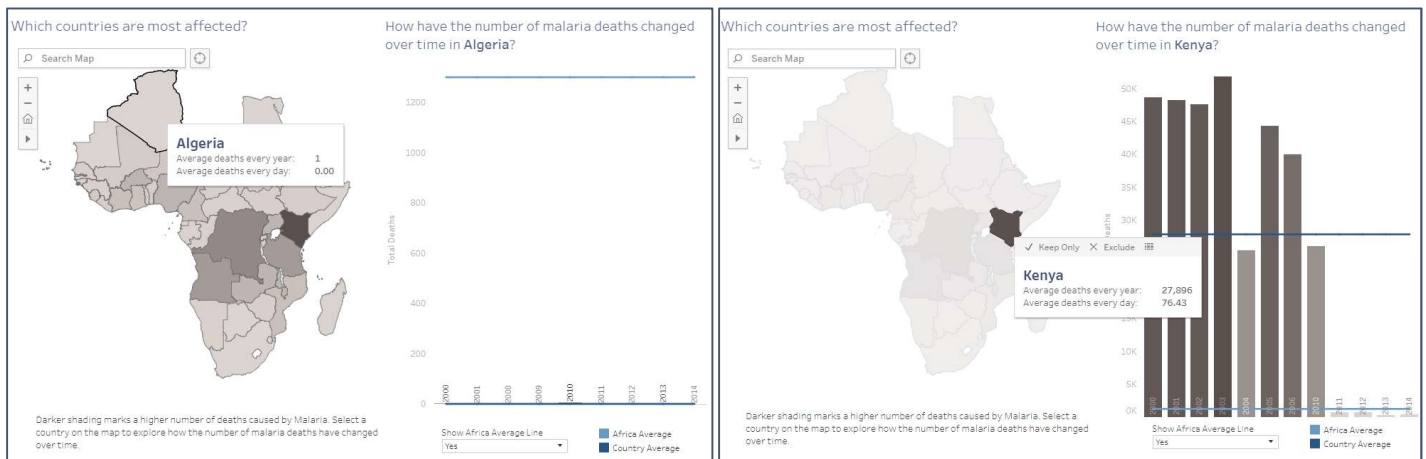

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

How have the number of malaria deaths changed over time in Angola?

Malaria deaths are easily preventable. Help today: <https://www.malariaelimination.org.uk/>

"In 2003, Angola seems to witness a malaria epidemic. From the dashboard, I clicked on Angola on the map, this showed deaths due to malaria for each year from 2000 to 2014. There were about 37K-38K deaths in 2003 compared to the country average of 11K (blue line) deaths."

"In the given sample, Algeria has been the least affected country, where as Kenya has been the most affected during the period 2000-2014. From the dashboard, one can see that Kenya has the darkest shade and hence has been the most affected. For finding the least affected country, I hover over the least shaded countries and Algeria seems to be the only one with zero average deaths per day."
